AI Readiness Checklist

A 5-minute self-assessment for Rio Grande Valley businesses.

Check the boxes that are already true for your business. The unchecked ones are where AI and automation can help you most. Your first project should be the easiest checkbox to fill.

Workflows

- ☐ We know which tasks eat the most staff time each week
- ☐ We have repeatable, rule-based work (intake, scheduling, follow-ups)
- ☐ Our team re-types the same information into multiple systems
- ☐ Customers wait on us for answers we could automate

Data

- ☐ Our key business data lives in systems we control
- ☐ We can export our customer/job data if we needed to
- ☐ Records are consistent enough to search and report on

Tools

- ☐ We use Microsoft 365 or Google Workspace
- ☐ Our core tools can connect to each other (APIs/integrations)
- ☐ We are open to a bilingual AI assistant for customers or staff

Team

- ☐ Someone owns "how we work" and could pilot a new tool
- ☐ Staff are comfortable trying software that saves them time
- ☐ We serve customers in both English and Spanish

Security

- ☐ We use multi-factor authentication on email and key apps
- ☐ We have backups we have actually tested
- ☐ We know who has access to what, and remove it when people leave

Most businesses can automate their first task in under two weeks. Book a free, no-pitch assessment at bis-rgv.com and we will show you the one that pays for itself first.
